03 Sterilisation & Instrument Care

Sterilisation und Instrumentenpflege · Sterilizzazione
Esterilización y cuidado del instrumental · Stérilisation

Stainless steel receptacles, sterilisation containers, instrument trays and maintenance products for safe reprocessing, storage and transport of surgical and dental instruments, together with sterilising forceps and preparation instruments.

EXCEEDING EXPECTATIONS

We are committed to supplying you innovative products.

QUOTATION SERVICES

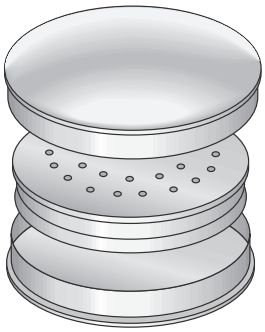

We will specify, code and price your requirements using our extensive product library, which enables us to cross-reference most products.

QUALITY

All instruments supplied by Vital Surgical Instruments conform to the highest European and international standards.

Lubricating and sharpening oil

SHARPENOIL

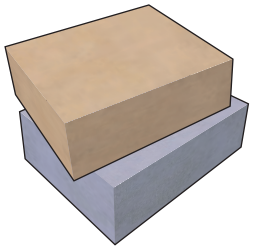

It is a non-coloured oil, which is an indispensable complement for lubricating and manual sharpening of surgical instruments. It should be applied to ensure perfect function and fluid movement of all surgical instruments (on all hinges or all other part which are subject to movement or friction).

Must always be used during all sharpening operations. It is used to activate the abrasive properties of all stones (Arkansas, India, etc.), and to reduce the possibility of overheating the instruments during sharpening.

Bacteriostatic Anti-Corrosion Milk

CLEANLACT

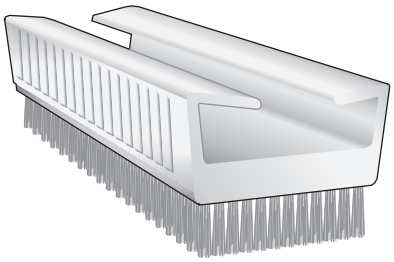

Extends your surgical instrument's lifetime. A periodic use of Cleanlact prevents corrosion; it has a bacteriostatic and lubrifying action on all instruments; it guarantees perfect maintenance by eliminating eventual stains, halos and browning due to sterilization, disinfection and washing with tap water. Must use periodically, diluted or concentrated (see special instructions on packaging).
